

Please reject NAB's petition 04-160.

I am a full time XM subscriber/listener who spends at a minimum of 3 hours per day in my car.

For years I have been dissatisfied with the choices available on the AM and FM radio bands caused by the homogeneity of format and station ownership. It's boring!

I have subscribed to both Sirius and XM radio, but have chosen to stick with XM because of personal preference in their programming selections. That's the whole point... I had a choice.

Since my commuting is in the Dallas, Texas area, I would now have the opportunity of being able to hear road and traffic conditions via XM based on their proposed plan to offer this service.

Please don't take away this service based on NAB's request.

Thank you,
Bob Brothers
